

COURSE INFORMATION SHEET

University: Catholic University in Ružomberok	
Faculty: Faculty of Education	
Course code: KGE/52G1025W/15	Course title: Field Course of the Geography of Slovakia
Type and range of planned learning activities and teaching methods: Form of instruction: Seminar Recommended study range: hours weekly: 2 hours per semester: 26 Teaching method: on-site (distance method according to the document Príkaz rektora P-8/2020 since 15. 10. 2020)	
Credits: 3	
Recommended semester/trimester: 2.	
Level of study: II.	
Prerequisites:	
Requirements for passing the course: Active participation in the six-day block field trip. Assessment of the report from the field trip.	
Learning outcomes of the course: Students are able to present knowledge of complex geographic characterization of Slovakia directly in the field. They apply theoretical knowledge from physical and human geography in the given area, using direct field observation and maps and other data sources. They employ basic methods of data collection and processing about natural, social and economic objects, phenomena and processes of the physical-geography and human-geography sphere and to create textual, tabular, graphic and cartographic outputs before, during and after the field trip and learn how to use this experience in geography education.	
Course contents: Analysis of components of the physical-geography and human-geography sphere in the particular area is followed by regional-geography synthesis. Geography observation, discernment of vertical and horizontal relationships directly in the field, study of mutual interconnectedness of the components of the physical-geography and human-geography sphere. Retrieval, comparison and confrontation of information from various sources (including maps) with the information obtained within the field trip. Overview of basic methods of data collection about objects, phenomena and processes of the physical-geography and human-geography sphere within the preparation before the field observation and mapping, in the course of the field trip, and also of data processing upon returning from the field trip. Exemplary practical exercising of methods of physical-geography and human-geography regionalization.
